

Project Design Phase-II Technology Stack (Architecture & Stack)

Date	03 October 2022
Team ID	PNT2022TMID20031
Project Name	Personal Expenses Tracker Application
Maximum Marks	4 Marks

Technical Architecture:

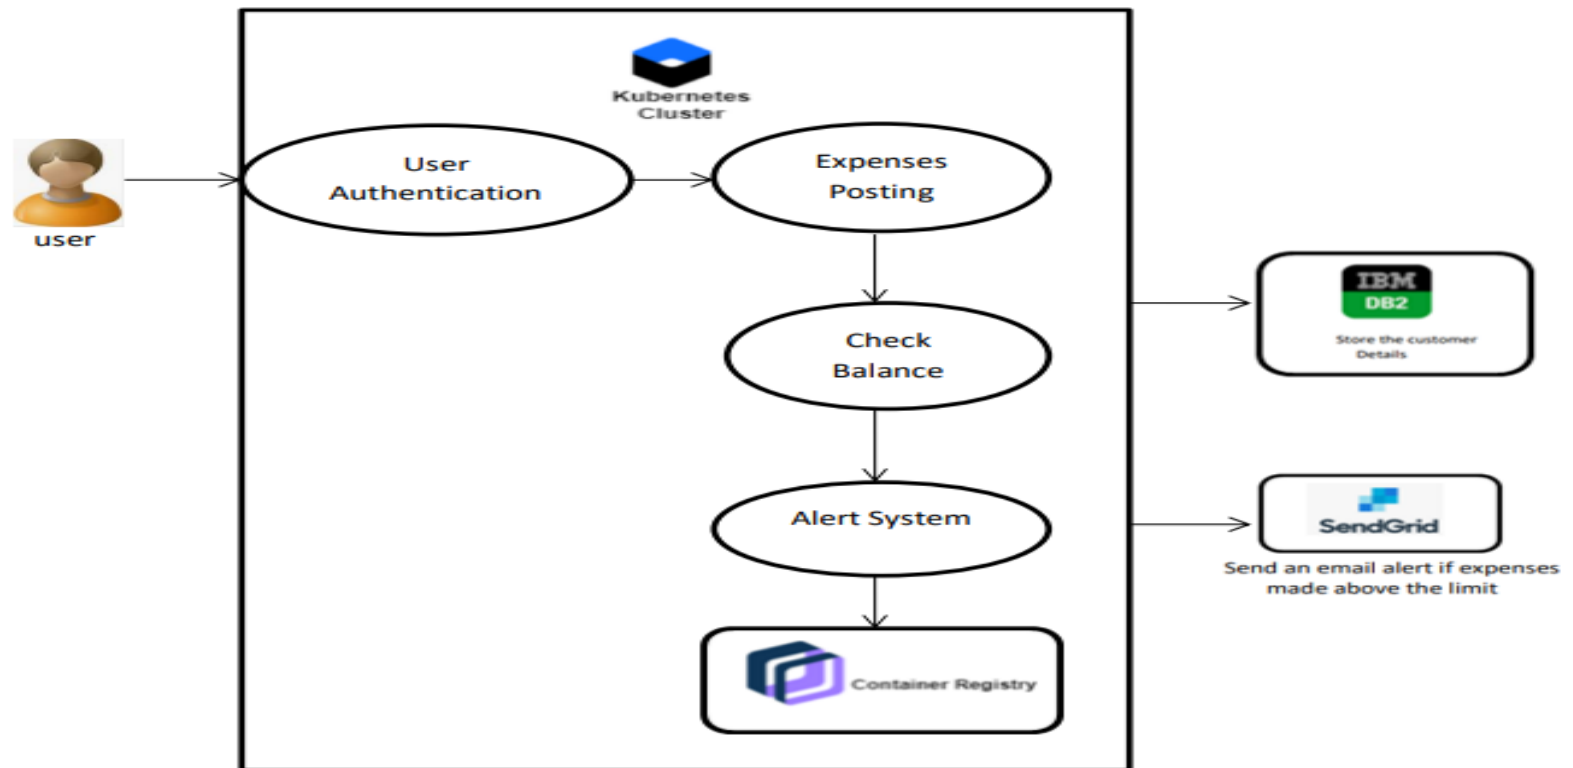

Table-1 : Components & Technologies:

S.No.	Component	Description	Technology
1.	User Interface	The user can Interact with the application with use of Chatbot.	HTML, CSS, JavaScript /Angular Js / React Js etc.
2.	Application Logic-1	The application contains the sign in/sign up where the user will logininto the main dashboard.	Java / Python
3.	Application Logic-2	Dashboard contains the fields like Add income, Add Expenses, SaveMoney.	IBM Watson STT service
4.	Application Logic-3	The user will get the expense report in the graph form and also get alerts if the expense limit exceeds.	IBM Watson Assistant,SendGrid
5.	Database	The Income and Expense data are stored in the MySQL database.	MySQL, NoSQL, etc.
6.	Cloud Database	With use of Database Service on Cloud, the User data are stored ina well secured Manner.	IBM DB2, IBM Cloudantetc.
7.	File Storage	IBM Block Storage used to storethe Financial data of the user.	IBM Block Storage or Other Storage Service or Local Filesystem

Table-2: Application Characteristics:

S.No	Characteristics	Description	Technology
1.	Open-Source Frameworks	Flask Framework in Python is used to implement this Application.	Python-Flask
2.	Security Implementations	This Application Provides high security to the user Financial data.It can be done by using the Container Registry in IBM cloud.	Container Registry, Kubernetes Cluster
3.	Scalable Architecture	Expense Tracker is a life time access supplication. It's demand will increase when the user's income are high.	Container Registry, Kubernetes Cluster
4.	Availability	This application will be available to the user at any part of time.	Container Registry, Kubernetes Cluster
5.	Performance	The performance will be high because there will be no networktraffics in the application.	Kubernetes Cluster
